COMPETENT ADVICE SINCE 1919

# LESCH HORN

NORM INDUSTRY MEASURING

## Products

## Commitment to quality, as standard Guaranteed quality for over 90 years

In 1919 Wilhelm Leschhorn founded the cornerstone of his wholesale business of technical products with the launch of its „cooperation for measuring equipment company“. In the beginnings, the family business specialised in an assortment of device parts, standardised parts and measuring equipment. In the following years the product line has regularly been updated and adapted to current market developments.

Since its creation Leschhorn focused on meeting client's needs for products within production chains and continues its corporate philosophy of „Everything out of one hand“ until the present day.

## Specialist with multiple skills

For over 90 years Leschhorn has been your partner for industrial business-to-business trade of technical products. To deliver our promise of being a „guarantor for quality and performance“, we continuously work with our engineers and experts to design innovative and purpose built products.

Our in-house production enables us to offer custom made products even for small quantity orders. Permanent monitoring processes of suppliers and product markets allow us to adapt our product line accordingly, to provide a regular up to date and customer-orientated product range.

We are currently an established supplier to well-known companies of different market sectors such as chemicals, pharmaceuticals, automobile and packaging technologies as well as utility companies and the mechanical engineering industries.

Our clients now number around 7000 national and international companies that are currently in longterm business relations with Leschhorn. Over the years these relationships evolved to being trustful partnerships, which shows that we are on the right track. It is the guarantee of longterm partnerships based on trust, competence and responsibility that draws clients back to Leschhorn as this represents our key focus.

## Our product line – Your versatile selection

To facilitate your selection we have compiled our extensive assortment of approx. 60.000 products into nine main groups. Find our full range of products in clear sortation online at [www.leschhorn.de](http://www.leschhorn.de). On the website you can comfortably research parts you are looking for through our overall search facility.

Should you have difficulties finding your desired product within our online range, we offer a variety of items on request. Feel free to contact us directly for enquiries!
